

Entry-Level Environmental Science Position

Geo-Cleanse International, Inc., an international environmental remediation firm, is seeking to fill entry-level positions with candidates possessing bachelor's degrees in environmental science, chemistry, geology, or related disciplines. The openings include a combination of office and field duties. Office duties will include report preparation, data management, and equipment maintenance in support of field activities. Field duties will include environmental drilling, sampling, and treatment operations. The field duties are primarily outdoor work and will require travel up to 50% of the time, including possibilities for international travel.

Desired educational backgrounds include courses and/or experience in hydrology and environmental chemistry, although on the job training is provided. Desired practical skills include computer (Word, Excel, PowerPoint, Access, AutoCAD), communication (verbal and written), and mechanical skills for field operations.

Ongoing professional training, short courses, and other continuing education are required, supported, and strongly encouraged.

More background on what we do is available at: www.geocleanse.com.

Our offices are located in Matawan, New Jersey.

If you are interested in joining our team, please forward a resume (including educational experience, references, and salary requirements) or direct additional questions to:
